

CASE STUDY

UNISYS : SINGLE SIGN-ON FOR MISSION-CRITICAL WEB SERVICES

ORGANIZATION

Unisys is a worldwide information technology services and solutions company. It combines expertise in systems integration, outsourcing, infrastructure, server technology and consulting, focusing in six primary vertical markets worldwide: financial services, public sector, communications, transportation, com-

Challenge

FALCON is a state-of-the-art system used by the Florida Department of Law Enforcement to identify criminal suspects and report data. Unisys offered to provide them with a Single Sign-On solution, making it easier and more efficient for authorized users to access this home-grown and third-party application.

The company required a system that would guarantee secure access to FALCON's applications by authorized criminal justice users and officers, while streamlining the process and increasing user-friendliness. Once authenticated, authorized users should be able to securely browse all of FALCON's mission-critical biometric identification applications.

Solution

JOSSO Enterprise Edition and Atricore made it possible for Unisys to deliver on their promise. Using our technology, they helped the Florida Department of Law Enforcement improve the user experience for authorized criminal justice users and officers accessing the FALCON system, by providing them with transparent Single Sign-On when accessing biometric identification Web services..

Client Benefits

- Enhanced user experience with improved ease of use and simpler procedures
- Password-free access for biometric identification applications
- Improved security by minimizing the potential for attacks
- Enhanced value proposition for criminal justice users and officers
- No vendor lock-in with the Internet SSO solution.
- Easy to configure and maintain.
